### Cover Letter

I'm looking for a new job opportunity in a company where I can make a more significant impact as an individual contributor and grow into a high-quality international specialist. I believe that Pinterest can be a place whose environment could help me gain professional skills. Based on my experience as Product Design Lead at Impress, I believe I could be a good fit.

I am experienced in creating products from scratch and evolving the existing ones on the way to improve business goals and customers' success and engagement. Therefore, I carefully approach each stage, from running customer research to framing hypotheses and testing them.

Now I am focusing on developing the design and research department. This role has provided me with solid leadership experience, including organising the hiring process, onboarding newcomers, planning personal goals, and managing expectations from the design department to stakeholders.

Please let me know if you'd be open to a conversation to discuss this position. I'm happy to provide you with any additional information you might need. I look forward to hearing from you.

Best regards, Jury Alyavdin
